Questions:
workshops@scratch.mit.edu

Join us for a BYOL (Bring Your Own Laptop) meetup to learn more about Scratch, a free programming environment created by the Lifelong Kindergarten group at the MIT Media Lab. With Scratch, young people can create interactive stories, games, and animations. Scratch is used in both formal and informal settings to help students think creatively, reason systematically, and work collaboratively. All educators, including those with no prior Scratch experience, are invited to attend.
