

Trail Blazer

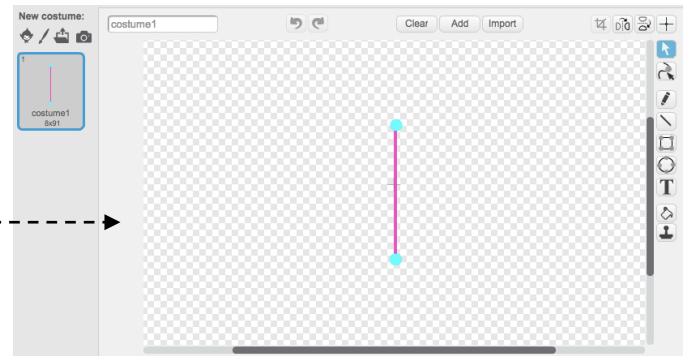

Help others make beautiful trailing art strings with loops and the stamp block.

In this challenge, you'll create a project that includes a pattern motif to be stamped across the stage. What will you create?

START HERE

- Draw your sprite using the Paint Editor.
- Add different Looks and Motion blocks to bring your sprites to life.
- Use the stamp block!

```
when clicked
  forever
    change color effect by 3
    turn pick random 1 to 10 degrees

when clicked
  forever
    point towards mouse-pointer
    move distance to mouse-pointer / 10 steps
```

```
when clicked
  go to x: 0 y: 0
  clear
  forever
    stamp
```

FEELING STUCK?

THAT'S OKAY! TRY THESE THINGS...

FINISHED?

- Try brainstorming with a neighbor!
- Create a list of things you would like to try before you start building your project in Scratch!
- Explore other projects to see what others are doing in Scratch - this can be a great way to find inspiration!

+ **BIG CHALLENGE:** Remix this project and make a new version with cloning NOT stamping. Then make the end of the trail disappear after 2 seconds. Like a "snake" trail.
