

GIFTS

objective: generate your own gift wrapping paper using a very simple script

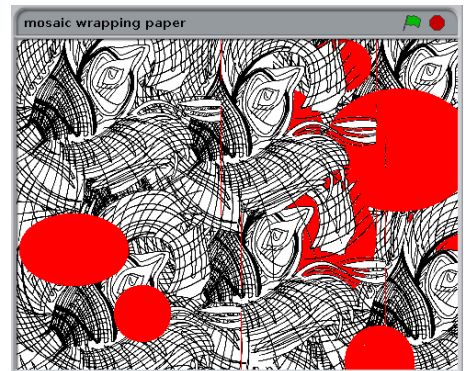

Behind the Scenes:

stage: import a background or paint one yourself that you would like to be the basis for your paper, add scripts to stage
no sprite

1) original stage: your stage should look something like this before you run the script.

2) generate wrapping paper: run your script by clicking your mouse. you can adjust the pattern by playing around with the number in the "change [mosaic] effect by [25]" block. print it when you're ready!

3) specifics: you may wish to add words and phrases to your paper like "happy birthday!" create a sprite with the text tool and use the script below.
