

HOME ROW SCATTER

objective: create an interactive piece using the home row keys as individual elements of a composition

Behind the Scenes:

stage: white, no background

the script put in the background can actually be put in any of the sprites' scripts.

the screen is cleared when the space key is pressed

Sprite 1-8: create 8 sprites for the 8 home row keys (a, s, d, f and j, k, l, ;) using the "paint new sprite" option. try a variety of font sizes, start small! each letter will have three costumes that will be the same letter with a different font (shown in screen shot on bottom right corner).

Sprites 1-8:

script is the same for all sprites with a few minor adjustments (sprite 2 for the letter "s" shown below)

select the letter you will be using
note: for ";" you will need to use a letter or number key because you cannot select symbol keys

generates more variety randomly in terms of sizes and font of the letter, if you choose to create more costumes (see right image) just change the "pick random" range

Costumes 1-8:
