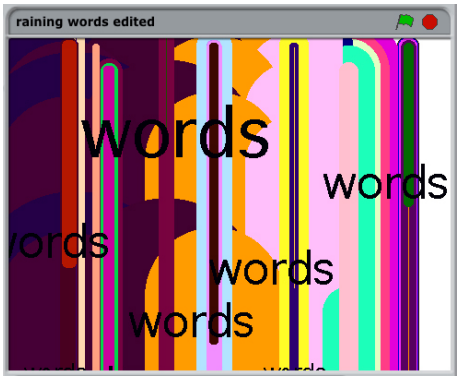
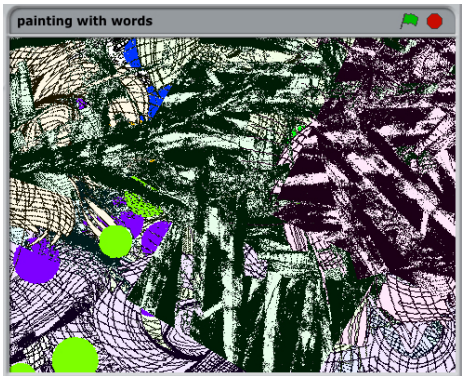
PLAYING WITH TEXT

Consider using text and letters in your Scratch projects. These four mini projects allow for the exploration of more advanced concepts of Scratch while exploring new ways of conveying information and playing around with words.

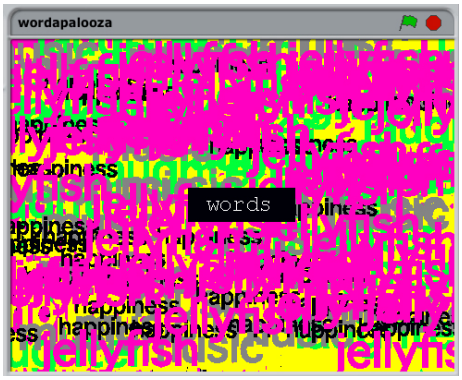
1) Home Row Scatter: create an interactive piece using the home row keys as individual elements of a composition



2) Raining Words: create a graphic made of raining words and their color trails



3) Painting with Words: create an interactive script that creates an image from words you type



4) Wordapalooza (CHALLENGE): creates a multilayer image from words of different colors that you can control
