

SCRATCH

Simon Says – Back at the Computer!

- Open a new file by clicking the  button.
- Try to move the cat across the screen using the move piece.

- What happens if you use a negative number?
- What happens if I use this piece with 15 degrees

- Change the turn piece above to turn 360 degrees. What happens? Why? (talk to your friends about why this happens!!!)

- Someone found out that something funny happens when they put these two pieces together and ran them. What happens? Why?

Name _____

Simon Says – Back at the Computer! (Continued...)

- Make your cat spin around 3 times. How did you make sure you could see the cat spin?

- Sometimes it can be hard to tell where the cat has moved. Try clicking on this piece before moving the cat around. Write what it does:

- What do these pieces do? (Write a description next to them.)

- Draw a dotted line (You might want to use repeat.)
